

Policy. 6

ELECTRICAL TESTING POLICY STATEMENT

THE POSITRON GROUP is committed to excellence in the design, manufacture, installation and commissioning of quality electrical products for long term use in the maintenance and conformance sectors of industry.

The following are summarised headings of our minimum requirements in testing procedures as to ensure that our products are fully tested and certificated and that they meet THE POSITRON GROUP's and our clients' requirements prior to handover or delivery:

- Visual Check (examine the product).
- Check Lists (check the product against the drawings and material list).
- Instrument Testing (apply continuity and insulation resistance tests etc to the equipment).
- Full Voltage Test (at full voltage, measure all voltage and current combinations together with general operational test of the equipment).
- Documentation (complete test sheet, QA and QC sheets, drawings, manuals etc).

Strict adherence of these requirements shall ensure constant improvement in terms of safety, quality and practicality, and consequently we shall maintain our status as an industry leader.

This policy shall be used in association with our standard Electrical Test Sheet.

JEFF HOGAN
CHIEF EXECUTIVE OFFICER
